

## Coding Exercise – Modify Style

- Here is a sample html file. Modify the style of the paragraph text through JavaScript DOM.

```
<!DOCTYPE html>
<html>
  <head>
    <title>JavaScript - JavaScript DOM Paragraph Style </title>
  </head>
  <body>
    <p class="my-p"> Change style of p element using DOM JavaScript.</p>
  </body>
</html>
```

- Apply below list of style:
  - Color
  - Font Size
  - Border
  - Padding
- You can use either `style` or `className` property of DOM.
