Coding Exercise – Get Element Text

- Here is a sample html file. Get the content/text of heading element through JavaScript DOM and display it using `alert` box.

```
<!DOCTYPE html>
<html>
    <head>
        <title>JavaScript - JavaScript DOM Get Element Text </title>
    </head>
    <body>
            <h1 id="my-h"> Welcome To This Course!  </h1>
    </body>
</html>
```
